## Sales

Hide **section details** in print and portal SO

Default **headers/footers** for quotation builder

Improved **combo** ux, support of optional products and better handling of single choice

## Loyalty

**Buy 2 for 20\$:** fixed price reward

**50% on cheapest if you buy 2:** If you buy 4, 50% on 2nd and 4th cheapest

**UI revamp**

## Rental

Define default **start/end hour** on rental period

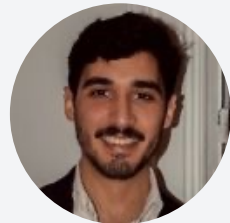

Link to **work calendar** for pickup/return days/hours

Define **pricelist rules** for rental

Reworked **rental transfers**

# Point of Sale

Mohamed Ben-Tahri

# Improved UX based on field experience

The image shows a screenshot of a restaurant POS system interface with several handwritten annotations in purple ink:

- Set date/time for future orders:** Points to a clock icon in the top navigation bar.
- Organise order by courses:** Points to the 'Course 3' header in the order list.
- Quick counter on the card:** Points to a small black counter on the 'Lunch Maki 18pc' card in the food section.
- Define presets; ideal for eat in/takeout/delivery:** Points to the 'Takeout' button in the bottom left section.
- Data saved in index DB. Reload only what's new:** Points to the 'Reload Data' option in the right-hand menu.

The interface includes a top navigation bar with 'Tables', 'Register', 'Orders', and 'For the partners'. A search bar is on the right. The main area displays a grid of food and drink items. The bottom section contains a table for customer orders and a summary bar.

# Shop Floor Design Update

The screenshot displays a software interface for shop floor design updates. At the top, there are tabs for 'Overview' (4), 'My WO' (1), 'Assembly' (2), and 'Drill' (2). A search bar is located on the right. On the left, a list of users is shown: Marc Demo (Assembly, 12", Drill, 6"), Mathieu Mano (Inactive), Mitchell Admin (Assembly, 2", locked), and Jenny Fletcher (Inactive). The main area shows a task card for 'WH/MO/00008 Assemble Table Feet Living Room Table' with '4 units'. The card lists tasks: 'Large-Wood-Plank' (5/4 units), 'Shelf 1/1328930' (5 units), 'Assemble table feet' (highlighted with a purple 'i' icon), 'Quality Check' (with 'X' and '✓' icons), 'Take a picture' (with a camera icon), 'Consumed Materials' (4 units), 'Quality Check' (with 'i', 'X', and '✓' icons), 'Print' (with a printer icon), and 'Empty instruction'. At the bottom, there are buttons for 'Edit Operators', 'Mark As Done', and a vertical ellipsis menu.

# ... And more!

## Invoicing

- Invoicing app with:
  - Follow-up
  - Aged reports
  - Bank sync
- Mixed expenses (private percentage)
- Streamlined Sending of invoices
- PEPPOL improvements

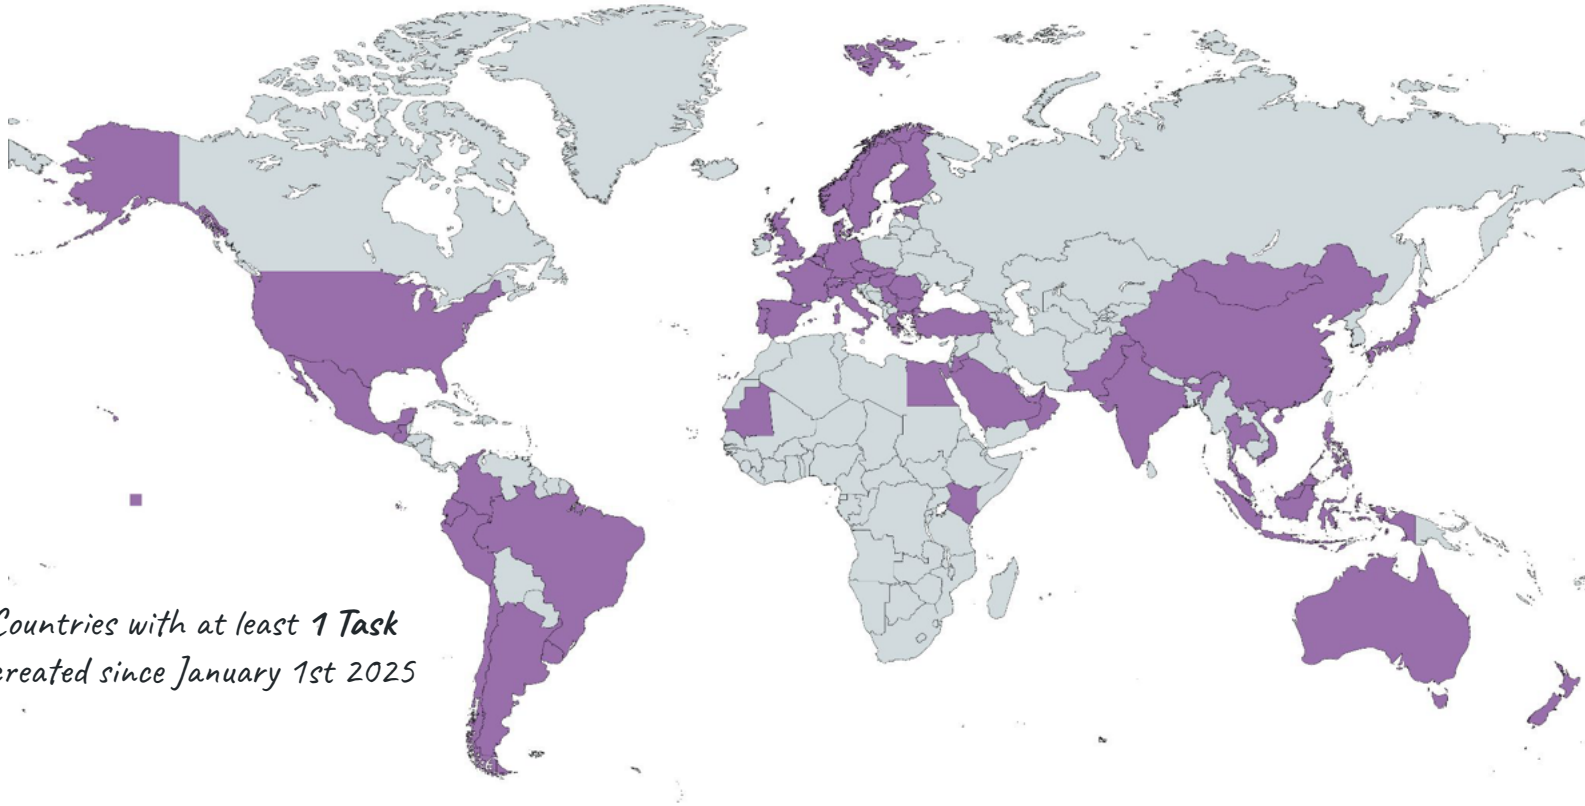

## Banks

- Improved wizard to connect your bank
- Payment Initiation with Ponto
- Bank sync coverage
- SEPA workflow improvements

## Reports

- Improved engine
- PDF Design improvements
- Annual statements
- Customer statement
- Light Audit Trail

## Accounting localisations: expanding the effort

AI

Luc Nailis

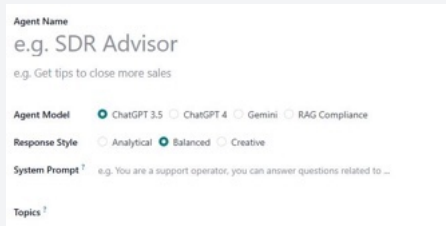

# AI

## Out-of-the-box AI integrations

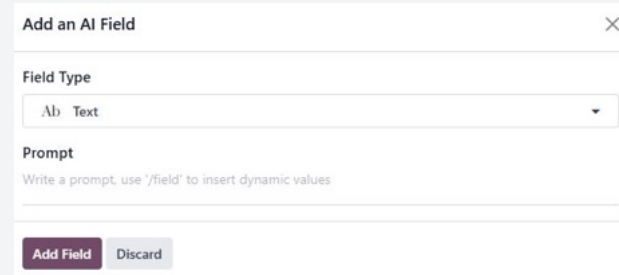

The screenshot shows a 'Update Notes' dialog box. At the top, it says 'Model ? Load'. Below that, there's a 'Type ?' section with a list of actions: 'Update Record', 'Create Activity', 'Send Email', 'Send SMS', 'Send WhatsApp', 'Add Followers', 'Remove Followers', 'Create Record', 'Execute Code', and 'Send Webhook Notification'. The 'Update Record' action is highlighted. Below this, there's a 'Multi Actions' button. At the bottom, there's a text input field with the placeholder 'Write a prompt for GPT-4o...' and a 'Notes' tab.

Server Actions - update fields via prompts

The screenshot shows an 'Agent Name' configuration form. It includes fields for 'Agent Name' (with the example 'e.g. SDR Advisor'), 'Agent Model' (with radio buttons for ChatGPT 3.5, ChatGPT 4, Gemini, and RAG Compliance), 'Response Style' (with radio buttons for Analytical, Balanced, and Creative), 'System Prompt ?' (with the example 'e.g. You are a support operator, you can answer questions related to ...'), and 'Topics ?'.

Agents - Chat with your own personal assistant

The screenshot shows an 'Add an AI Field' dialog box. It has a 'Field Type' dropdown menu with 'Ab Text' selected. Below that, there's a 'Prompt' section with the instruction 'Write a prompt, use '/field' to insert dynamic values'. At the bottom, there are 'Add Field' and 'Discard' buttons.

Field Definition, via Studio & Properties

*But also better integration in the chatter, mail composer, editor, ... and a lot of other surprises!*

# Automated/Server Actions

The screenshot shows the 'New Automation Rule' configuration page. The interface includes a top navigation bar with links like 'Settings', 'General Settings', 'Users & Companies', 'Translations', 'Gamification Tools', and 'Technical'. The main content area is titled 'New Automation Rule' and contains the following elements:

- Model:** Contact
- Trigger:** On create (Annotated with a red box and the text *"New" trigger*)
- Apply on:** Match all records (133 record(s))
- Actions To Do:** A section with an 'Add an action' button (Annotated with a red box and the text *Reorder*)

A modal window titled 'Create Actions' is open, showing the 'Send message to:' configuration. The modal includes a 'Type' dropdown with options like 'Update Record', 'Create Activity', 'Send Message' (highlighted with a red box and the text *New actions: Send Message & Duplicate*), 'Send Email', 'Send SMS', 'Send WhatsApp', 'Add Followers', and 'Remove Followers'. Below the dropdown are fields for 'Message Template' and 'Send To'.

# Mobile

# *Access Rights*

- Instead of adding a user in all dependent groups, the implications are now computed to distinguish which groups are manually set
- New user interface to easily customize groups, privileges (= list of groups for a scope) and sections
- Access rights and records rules will be merged to avoid breaches
- Default user replaced by default access rights
- The user who installs an app will be the only one to get the access to this app

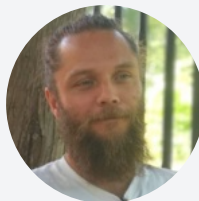

# Performance

- Menus in cache: 200ms faster at each page load
- Search: replace "=" operator with "in"
- Read group unity: *load records of all groups in the same request for each groups to batch the read of records*
- Calendar: speed-up rendering

# *Industries*
